Common Uses: Wood Fencing, Construction, Road Signs, Decking, Park and Recreation, Portable Building, DIY, Signs  
Driver: Oz-Hammer™- OH-05  
Specifications: 3mm hot dipped galvanized high grade steel. Bolts included for attaching post.

This cedar post was only in the ground for 4 years. Looking closely you can see that the post is only rotten in the area that was below ground level! With Oz-Post™ your posts are protected from rotting below the ground level! A fence is a large investment, be sure and use Oz-Post™ to protect your posts from prematurely rotting away.

# Oz-Extractor

## Oz-Extractor

The Oz-Extractor is the perfect companion for any business that uses Oz-Posts on regular bases. The Oz-Extractor can quickly and easily remove an installed Oz-Post. This tool is great for companies that utilize Oz-Posts for temporary fencing. The Oz-Extractor is also useful for removing Oz-Posts that have been positioned incorrectly.

With its wide base, powerful jack and wheels for easy moving, the Oz-Extractor can get the job done quickly. The jack can be easily removed for compact storage and transport.

# Oz-Extractor with Post Clamp

## Oz-Puller with Wood Post Clamp -

This model has all of the features that the Oz-Puller has with the added benefit of wood post extraction capabilities. Simply place the post clamp around the base of the post, engage the jack and extract the post, concrete and all! Moving the extracted post is easy with the Oz-Pullers heavy duty rubber tire wheels. To move the extracted post just tilt the extractor back and pull to desired location. The post and concrete are safely cradled between the support frames even on rough unlevelled terrain.

# Oz-Post™ has an unlimited amount of uses!
