

Vinyl PVC Solar Post Caps

... The ultimate in outdoor accent lighting

Solar accent lighting beautifies in two ways. By day it is a detailed, decorative vinyl post cap. But as night falls the magic will emerge, casting a beautiful subtle glow downward onto the outside walls of the cap and surrounding area.

The effect adds radiance and allure to any style of fence... picket or privacy, deck or porch rail... or to a mailbox post, walkways and more.

Not only are they environmentally friendly, they contribute security and value to your property.

Powered by a monocrystalline solar panel allowing up to 10 hours of light per night

Manufactured from UV Stable, 100% prime PVC (vinyl) guaranteed not to fade, yellow or rust

Each solar post cap has 4 high output LED ultra bright white lights

2 long life AA 1000 mAh NiCad rechargeable batteries (no wiring)

Photocell: lights up automatically every night

Will fit over any standard vinyl or wood post.
